**General Comments**

5E/6E

5E/6E interior "D" Songtao Huang and Sangtao Huang were hand welding, or stick welding, between the stiffeners.

4E/5E exterior "C" two ironworkers continued welding/gouging the joint at this face. There was a small fire in the morning when some welding curtain material below the area being welded caught fire. The fire was immediately put out, and there was no damage of any kind to the structures.

For details concerning welding see the METS diaries.
